TEAM & DESIGN SYSTEMS, BUILT
FROM ZERO

CX and Product Design leader with over a decade of experience — from pre-seeded startups to national institutions. Twice built functions from zero inside the same ecosystem: spent four years at Jewel Digital building the digital products, then stepped into PNB to govern and optimise the customer experience of those same products for the same users. Design side, then CX side. Same institution. Same 22 million people. A complete view of the entire customer journey within the ecosystem.

EXPERIENCE

PNB (Permodalan Nasional Berhad)

Mar 2025 — Present

HEAD OF CUSTOMER EXPERIENCE

Malaysia's largest government-linked fund management group. The CX function did not exist — built from scratch with an explicit mandate to professionalise customer experience as a strategic discipline inside a national institution.

Built the CX function from inception: governance models, performance reporting frameworks, cross-departmental ownership structures, and feedback loops across all business units. Designed and implemented the organisation's first consolidated weighted CSAT methodology — the first cross-channel baseline PNB had ever produced. Introduced the CX Scorecard linking operational KPIs (resolution times, error rates, onboarding completion) directly to experience outcomes. Implemented VoC programs consolidating feedback from app, web, call centre, branch, and social into a single insight pipeline feeding product and operations planning. Responsible for the end-to-end customer experience across 22M+ users: 14.7M digital, 7.5M branch and agent.

Jewel Digital Ventures

Feb 2021 — Feb 2025

HEAD OF PRODUCT DESIGN

Digital arm and innovation lab of PNB — building a financial wellness ecosystem for 30 million people. The design chapter: built the products that the CX chapter would later govern and optimise.

Built the multidisciplinary product design team from zero — hiring and developing designers, UX researchers, and CX specialists, establishing team culture, workflows, and quality standards. Designed and scaled end-to-end digital ecosystems across investment platforms, onboarding flows, account management tools, and financial service experiences. Led moonshot projects from early proof-of-concept through to market-ready products. Established design systems, component libraries, and research frameworks that reduced duplication and accelerated delivery. Embedded user-centred design practices across engineering, product, and business teams.

DESIGNED FOR MARKET SHARE
NPS 30 → 66 · 2021–2025

Drove design and innovation for a large-scale user base. The digital products shaped here are directly traceable to the NPS trajectory — now the highest in Malaysia's investment fund industry.

Maybank

Jun 2020 – Feb 2021

ASSISTANT VICE PRESIDENT, UX/UI

Malaysia's largest bank. MAE and Maybank2U – the most widely used consumer banking apps in Malaysia, serving millions of retail customers.

Led UX design across MAE and Maybank2U, driving usability enhancements to core banking flows including account management, fund transfers, bill payments, and financial product discovery. Directed a cross-functional design team across multiple product verticals. Pioneered lifestyle-centric banking experiences – integrating payments, rewards, and everyday activities into cohesive app experiences, repositioning Maybank's products as daily-use tools. Drove design system adoption and consistency across digital platforms. Contributed to merchant banking design experiences.

UX ACROSS BANKING, PAYMENTS & DESIGN SYSTEMS
MALAYSIA'S LARGEST BANK

MAE and Maybank2U – the most-used consumer banking apps in Malaysia. Lifestyle banking as a genuine design problem, not a branding exercise.

Fave

Jul 2018 – Jun 2020

LEAD PRODUCT DESIGNER

Digital commerce, cashback & payments – Malaysia, Singapore, Indonesia.

Directed the end-to-end redesign across Malaysia, Singapore, and Indonesia – e-wallet and payments design, design systems, and a rapid experimentation practice built from scratch.

dahmakan

Mar 2018 – Feb 2019

PRODUCT DESIGNER • YC W17

Malaysia's first farm-to-fork food delivery platform – Y Combinator-backed.

Designed the full consumer digital experience – meal discovery, subscriptions, and delivery scheduling. Embedded directly with founders in a fast-paced zero-to-one environment.
